

I am taking this class because I am very interested in graphic design. Through this class and upcoming VMD courses, I hope to learn skills that I may utilize in the future as I look into careers that involve digital illustration.

**"PRINCE OF THE CITY"**

For my Raster Project, my concept was to  
showcase my city, San Francisco. I added  
a snowy mountainous background wanting  
to kind of create a Game of Thrones  
type feel in order to match my selfie  
portrait. I tweaked the concept a little by  
adding graffiti-style drawings over the  
image to showcase my love of street art.

# BREAKFAST BUDDIES™

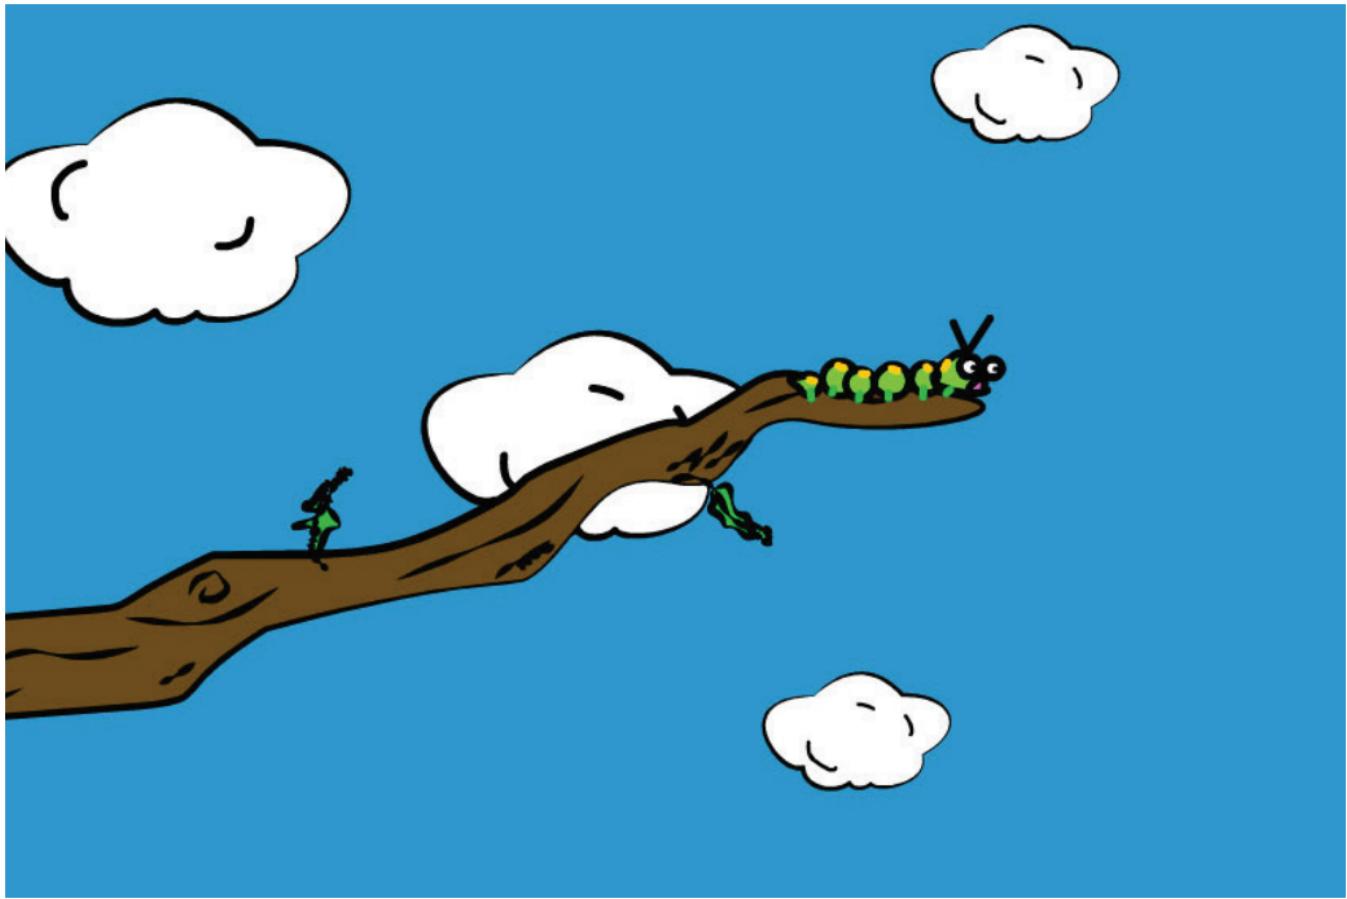

For my Vector Project, I wanted to create  
a flower and bird using the handy pen  
tool in Adobe Illustrator. This was a fun  
project as I am used to free drawing lines  
instead of using a vector program to  
draw out the various shapes. I also created  
a mini snail playing around with the  
spiral tool.

Summer 2018

For my Time Based Media Project, I wanted to show a caterpillar's journey to become a butterfly. I worked 2 days on my project and my animation was a length of only about 20 seconds, so now I have a deeper appreciation of how much work and time it takes to create full length animated shows and movies.
